

## III.5

# Lidské zdraví a bezpečnost

# Vysvětlivky

## abstraktní objekt [AO]

Vazba

## objekt reálného světa

objekt je podtypem abstraktního objektu

## povinný atribut objektu

zrušitelný atribut objektu (voidable)

omezení

## datový typ

## povinný atribut datového typu

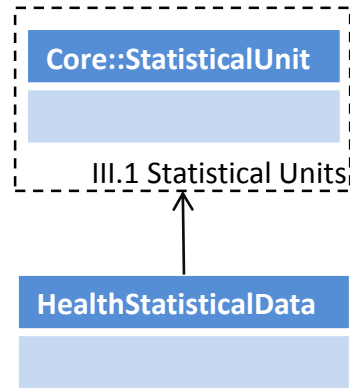

## číselník

hodnoty číselníku

# Lidské zdraví a bezpečnost

- Téma obsahuje dvě podtémata:
  - HealthStatisticalData
    - všechny prvky jsou navázány na téma III.1 Statistické jednotky
    - tři modely
      - Core – základní model
      - Full – statistická data o nemocech, zraněních a biomarkerech
      - CodelistEnumetation - číselníky
  - EnvHealthDeterminant
    - agregovaná data jsou navázaná na téma III.I
    - primární data jsou poskytována podle standardů O&M

# HealthStatisticalData - Core

# HealthStatisticalData

## Health Statistical Data [AO]

prostorově navázán na statistickou jednotky (Statistical Units)

Type

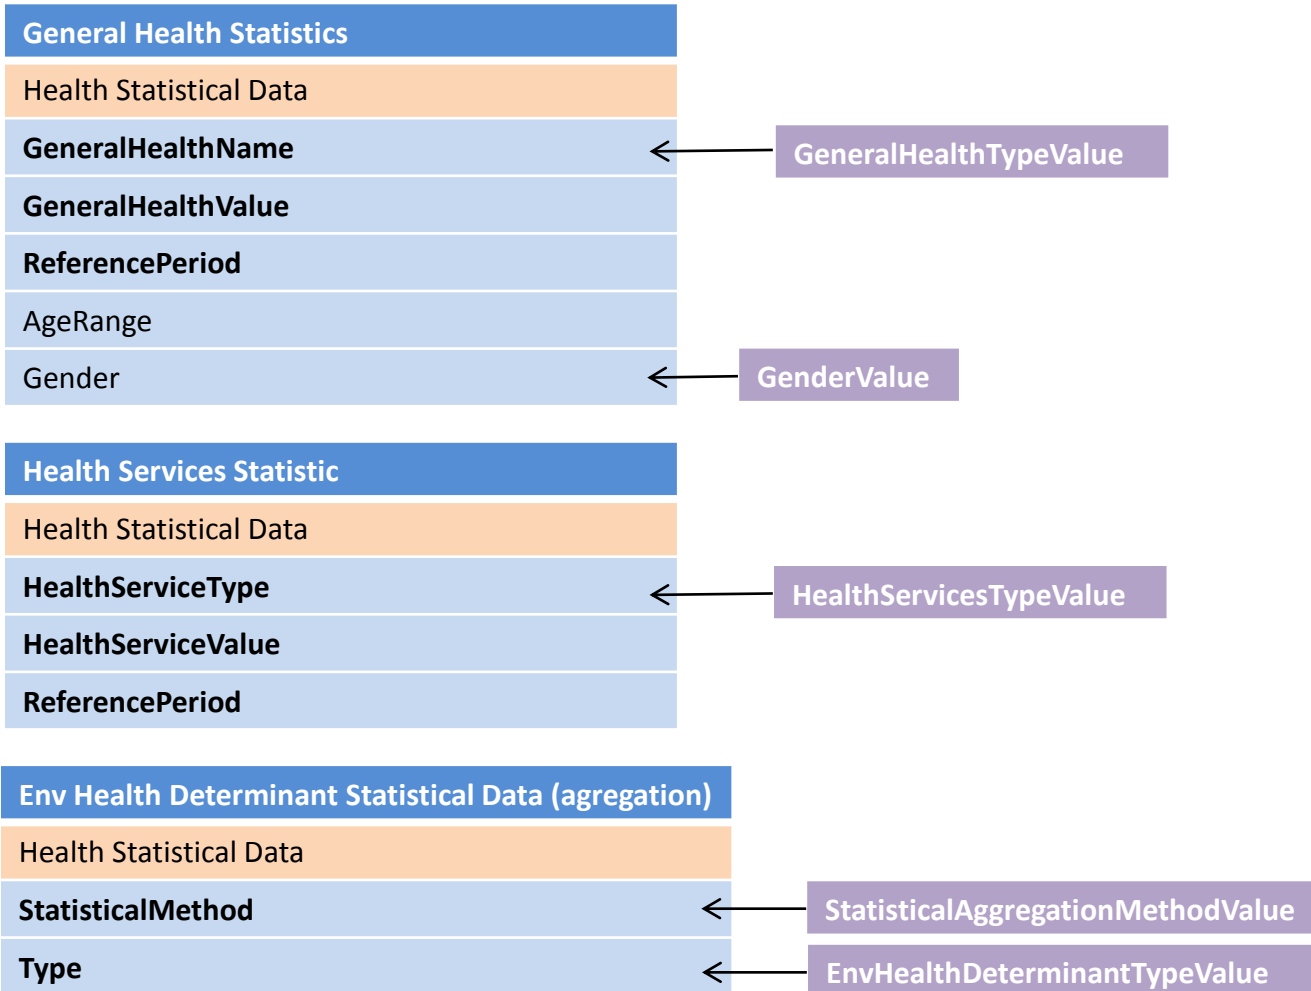

# HealthStatisticalData – Full I.

# HealthStatisticalData – Full II.

# HealthStatisticalData – Full III.

# HealthStatisticalData – Codelists I.

## ICDValue

Values only from the „10th revision of the International Statistical Classification of Diseases and related Health Problems, published by the World Health organization“.

## CODValue

Values only from the „European Shortlist for Causes of Death published by Eurostat“.

## Base types 2::GenderValue

female

male

unknown

## DiseaseMeasureTypeValue

incidence

mortality

outbreak

prevalence

and additional values at any level defined by data providers

## MatrixValue

any values defined by data providers

## ChemicalValue

any values defined by data providers

# HealthStatisticalData – Codelists II.

## GeneralHealthTypeValue

long standing illness

measured BMI

self perceived BMI

self perceived health

self perceived limitation of daily activity

smokers

and additional values at any level defined by data providers

## StatisticalAggregationMethodValue

maximum

mean

median

minimum

standard Deviation

sum

and additional values at any level defined by data providers

## HealthServicesTypeValue

average length of stay

bed days

curative hospital bed

day cases

discharge

health care expenditure

hospital bed

physician

practising physicians

psychiatric care bed

and additional values at any level defined by data providers

## EnvHealthDeterminantTypeValue

air

indoor Air

noise

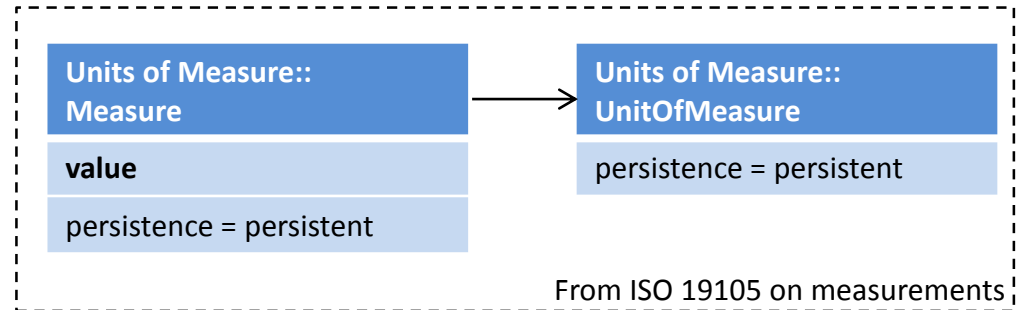

pollen

watter

and additional values at any level defined by data providers
