# Energy Resources Base

ClassificationAndQuantificationFrameworkValue	FossilFuelValue	FossilFuelClassValue
Norwegian Petroleum Directorate classification (NPD-2001)	crude oil	natural gas liquids
Pan-European Code for Reporting of Exploration Results, Mineral Resources and Reserves (PERC)	hard coal	contingent resources
Petroleum Resources Management System	low-rank coal	proven reserves
Russian reserve guidelines	natural gas	resources initially in place
United Nations Framework Classification (1997)	oil sands	and additional values at any level defined by data providers
United Nations Framework Classification (2004)	oil shales	
United Nations Framework Classification (2009)	peat	
United States Geological Survey		
and additional values at any level defined by data providers		
VerticalReferenceValue	RenewableAndWasteValue	
ground level	biogas	solar photovoltaic
lowest astronomical tide	geothermal	solar thermal
and additional values at any level defined by data providers	hydro power	solid biomass
	industrial waste	tide, wave, ocean
	liquid biofuels	wind
	municipal solid waste	
VerticalExtentRangeType	VerticalExtentValue	VerticalExtentType
upperBound	range	verticalReference
lowerBound	scalar	verticalExtent

# Energy Resources Vector

# Energy Resources Coverage

INSPIRE Data Specifications – Base Models  
– Coverage Types, version 1.0 [DS-D2.10.2]

## Coverage

## CoverageByDomainAndRange

### domainSet

### coverageFunction

### rangeSet

### gridFunctionRequiresGridDomain

## RenewableAndWastePotentialCoverage

### domainExtent

### inspireId

### potentialType

### typeOfResource

#### assessmentMethod

#### name

#### validTime

#### verticalExtent

#### beginLifespanVersion

#### endLifespanVersion

## WindPotentialValue

average mean wind power density

average mean wind speed

and additional values at any level defined by data providers

## PotentialTypeValue

any values defined by data providers

## HydroPotentialValue

potential hydro power

and additional values at any level defined by data providers

## TidalPotentialValue

average peak flow

mean neap tide peak flow

average tidal power

mean spring tidal power

mean neap tidal power

mean spring tidal range

mean neap tidal range

mean spring tide peak flow

and additional values at any level defined by data providers

## RenewableAndWasteValue

## VerticalExtentType

### verticalReference

### verticalExtent

## GeothermalPotentialValue

geothermal gradient

temperature

and additional values at any level defined by data providers

## SolarPotentialValue

diffuse irradiance

direct normal irradiation

diffuse irradiation

global horizontal irradiance

direct normal irradiation

global horizontal irradiation

and additional values at any level defined by data providers

# Energy Statistics

INSPIRE Data Specifications – Statistical Unit [D2.8.III.1 ]
